when it really counts

PROFESSIONAL SYSTEM SOLUTIONS FOR THE CONSTRUCTION TRADE.
Dear Readers,

Restoration, renovation and modernization are essential construction tasks in the 21st century. Therefore more and more complete professional solutions are required to meet these growing demands. We have been on location and listened closely to professionals all over Europe for this very reason, and now we are better informed about what you need: reliable solutions in numerous work areas, all from one competent partner.

We call this systematic construction & restoration, i.e. with perfectly coordinated consumables and system accessories. The best thing about our range is that there is a cordless version of almost every machine - the future belongs to the battery pack, and we resolutely follow the vision of a cordless construction site. With its experience in battery packs and the battery pack innovations, Metabo is a safe decision for the future.

Moreover, we attach particular importance to highest user protection - with focus on a dust-free workplace. Convince yourself and test our extensive range for systematic construction and renovation. We look forward to receiving your feedback.

Your

Horst W. Garbrecht CEO Metabo

THE PARTNER FOR THE CONSTRUCTION TRADE

Our close connection to the trade makes all the difference. Based on your daily practical requirements we have improved our tried and trusted products and developed additional problem solvers.

Whether demolition, preparation or construction: At Metabo, professionals will find the right tool for almost every application and work stage in the construction process. With Metabo you easily achieve perfect results and have the perfect partner for almost every task.

Independence from mains power.
Maximum freedom with full compatibility: We also offer you any relevant power tool in a cordless version.

Best example: the new cordless dry wall screwdriver range. Metabo’s battery pack system provides you with sustainable technology for all devices.

Unparalleled system range.
Whether you are sanding ceilings with the new long-neck sander or mixing coating materials with the new stirrers: Apart from power tools, we also offer an extensive range of system accessories and consumables for the professional user. Perfectly tuned to each machine for optimum results they support our system solutions, enabling a clean, safe and healthier working environment for the user. These system components range from safety tested vacuum cleaners for the construction site, and for example, cordless lighting, to dust extraction hoods for angle grinders.

In a nutshell: Metabo offers you not only the best, but also a complete equipment range for all future tasks!
REQUIREMENTS OF PROFESSIONALS – CHALLENGES FOR US.

We believe: **Listening is the start of any good idea**, for opinions and practical experience have been leading us to innovation and optimisation of our solutions ever since.

Our drive: We wanted to know what professionals need in practice and how we can provide even better support. Therefore we went on site and carried out one of the most extensive surveys with craftsmen in our company’s history - with 1,500 interviews at more than 500 craft based businesses in Europe.

---

**Metabo in dialogue.**
Our application expert G. Arnold talking to professionals on site.

---

Our solutions - everything is a question of application.
We have analysed different construction sectors, their applications and the tools used. We have identified six important application areas in this process. On the following pages you will find proven and new solutions from Metabo for these core areas.
A MULTITUDE OF POSSIBILITIES: SYSTEMATIC CONSTRUCTION & RENOVATION

From demolition and preparation to development: You can find the tools required for every application and work stage at Metabo. Always supported by intelligent system solutions for a clean workplace whilst ensuring the highest user protection.

Demolition: Power tools that pack a punch.
With our wide range of drills, combination hammers, chisel and multi hammers you easily manage to get through any wall. Even old wall and floor coverings, tiles, or the entire screed layer can be quickly removed.

Preparation: Professional tools for optimum foundations.
The removal of plaster, concrete projections, old layers of paint, stubborn residue of adhesives from carpets or linoleum often require time. With our new renovation grinders and routers these tasks are accomplished in no time at all.

Development: System solutions for the final touch.
A perfectly finished wall or ceiling is just what you and your customers want. When even the smallest detail matters, you can safely rely on a Metabo solution e.g. our new long-neck sanders. Even in very high or extremely narrow rooms you achieve excellent work results in no time at all.

Naturally, we also offer professional craftsmen other system solutions for various applications where both speed and finish is important.

Durable, robust and powerful from start to finish, and also as cordless - these are the main criteria for us with all further and new developments. Ergonomics and mobility of our products are also important: Only tools that fit comfortably in your hand, are easy to operate and can be transported without problems are produced in series by us. This ensures that you reach your goals quickly and with the least effort possible.
THE METABO CORDLESS SYSTEM: CORDLESS HIGH PERFORMANCE

We all know how tedious cables can be in our daily work. Therefore we manufacture those relevant and technically feasible power tools also in a cordless version to give you independence from the mains power supply.

Our vision: Your ultimate independence.
The ambitious aim of our efforts is a cable-free construction site. This gives you maximum freedom, whether you are driving in screws, sawing, grinding or cutting.

The future belongs here mainly to the 18v interface, which permits high output and an enormous bandwidth of solutions.

With Metabo you are always on the right track - even tomorrow.

The most important benefit for you: the limitless compatibility! Since 2009, all Metabo battery packs, machines and chargers of the same voltage class can be flexibly combined and used with each other.

With Metabo you are always on the right track - even tomorrow.
ADDITIONAL PRODUCTIVITY BOOST: INTELLIGENT SYSTEM SOLUTIONS.

With perfectly tuned consumables and system accessories, organisation tools and efficient extraction systems you ensure an additional increase in your productivity.

Clean solutions - extraction systems for dust-free working.

Your customers expect excellent work results. If you also leave behind a clean work environment, you will also leave a particularly good impression, which will result in a significantly higher rate of recommendation! The protection of your health is also important to us: With our H-vacuum cleaners the dusts extracted during sanding, sawing or routing end up in a filter bag instead of your lungs, thanks to a filter separation efficiency of up to 99.995%. The development of low-noise and low-vibration machines is always a part of user protection for us - to let you work better and for longer.

Premium organisation and everything at hand - the Metaloc case system.

The new system cases from Metabo are robust and dimensionally stable: drops, impacts, wind and weather are no issue for them - they are designed for the roughest of site conditions. They are available in three different sizes and the interior is individually adapted to accommodate different tools, which makes them the perfect companion for any application. Furthermore, the boxes can be stacked and locked together, opened or closed with one hand thanks to a practical closure, and carried with one handle. This saves time and unnecessary travel.

Optimised power - with the right accessories.

Apart from extraction systems, the extensive system accessories also include battery packs and chargers, powerful cordless site spotlights, as well as machine stands for saws. Naturally, you also have a complete range of Metabo quality consumables, such as cutting and roughing discs, saw blades, chisel bits, screws, drill bits, chucks and much more.

All perfectly tuned to each other - and thus real performance boosters for your power tools.
Over 90 years of experience have taught us what matters, and when it matters. It’s not without reason that we are Europe’s market leader in crosscut saws, inventor of the first 1,700 Watt compact angle grinder, and for years redefining the performance capabilities of battery pack systems. Experience now the comprehensive range for systematic construction and renovation - especially the new cordless machines.

Proven quality - made in Nürtingen.
Metabo stands for enormous efficiency, absolute reliability and unparalleled service life of its products. In a nutshell: innovative engineering from Nürtingen.

Be prepared for new top-notch products, e.g. the drywall screwdriver series, both mains-powered and cordless, the flexible long-neck sander, the unique cordless crosscut saw, renovation router and sander, the cordless multi-tool and new stirrers and site compressors.

For every application the ideal tool - come and have a look!
SMART FINISHING: INNOVATIONS FOR DRYWALL CONSTRUCTION.

These days drywall construction meets the highest demands of design, impact strength and protection against the heat, cold, noise and fire. To ensure that these demands are met, pros need reliable and powerful construction tools. We provide a comprehensive assortment for all your drywall construction tasks – from building the stud framework through to the perfect surface finishing of walls and ceilings.

Drywall screwdrivers
Now the widest range with three different speed ranges available in mains or cordless versions.

Long-neck sander
Light and practical with innovative dust extraction. Adjusts to three working lengths to suit various room heights and sizes.

Stirrers
Whether for heavy mixtures or light fillers – available in four versions for different applications.

Combination Hammers
Cordless or mains, for chiselling away old construction materials or for drilling to mount stud framework.

Cordless Site Light
7 hours of bright light from only one charge thanks to innovative and durable LED technology.

Cordless Multi-Tool
Essential for cutting and modification tasks – a new addition to the 18 volt Metabo cordless Pick+Mix system.

Disc Sanders
Two machines in one – with the patented dual oscillating circuit for coarse and fine finishing.
SPECIALISTS FOR EVERY APPLICATION; 
THE NEW DRYWALL SCREWDRIVERS

Several thousand screws are continuously inserted every day in drywall construction. That’s why we developed the practical and powerful drywall screwdriver delivering between 2,500 to 6,200 rpm in a choice of mains or cordless versions. The ideal tool for every situation.

- High speed for rapid fixing and quick productivity.
- The lightweight and compact design makes work easier, even in continuous use.
- Perfect control element ergonomics for ideal handling.

SE 2500/SE 18 LTX 2500: high-speed drywall screwdriver for fixing gypsum plasterboards and gypsum fibreboards to wood and metal framework.
SE 4000/SE 18 LTX 4000: drywall screwdriver for fixing gypsum plasterboards to wood and metal framework; also suitable for gypsum fibreboards on metal framework.
SE 6000/SE 18 LTX 6000: the specialist for gypsum plasterboards to metal framework at high speed.

Precision fixing thanks to the precise adjustable depth stop and silent claw clutch.
Fully removable depth stop – for the quick removal of screws or switching between magazine application and individual fixings.

Quick and easy forward/reverse selector and locking switch with single-hand operation.

SM 5-55 - Screwdriver magazine
Compatible with all drywall screwdrivers: for applying screws accurately in quick succession with conventional screw strips. Easy to clip-on without the use of tools.

Maximum productivity with the right accessories

MORE ON PAGE 82
COMPATIBILITY MEETS FLEXIBILITY: THE INNOVATIVE LONG-NECK SANDER

Faster, more convenient, cleaner: needs voiced by pros when sanding walls and ceilings. Whether sanding close to edges or the need for optimal extraction – our new long-neck sanders fulfil all the desired criteria with distinction so that you can more easily achieve your goal: precise surface finishing!

- **Powerful motor** with infinitely variable speed control reduces effort and enables a quick speed adaptation to the material being processed.
- **LED light** to quickly detect imperfections and serrations.
- **Service-friendly flexible shaft** – easy and quick replacement without the use of tools.
- **Innovative sanding head** for work close to edges – saves time and unnecessary reworking.
- **Innovative, tubeless suction design** M-Clean technology – for maximum flexibility of the sanding head, and effective suction.

**The LSV 5-225** is a lightweight at only 3.9 kg.

**LSV 5-225 Comfort**, flexible application in three lengths.

**Maximum productivity with the right system**

Optimal work results:
- in combination with the ASR 35 L or M ACP vacuum cleaner with automatic filter cleaning.
- and the matching sanding tools for every application.

You can find more info on page 77.
BRING EVERYTHING TO LIGHT: CORDLESS SITE LIGHT FOR CONTINUOUS USE.

The Metabo cordless LED site light provides optimal lighting for up to 7 hours (18 V, 5.2 Ah). The extensive and consistent illumination means that the site lights are also ideal for assessing the surface finish of plaster work. They bring even the slightest irregularities into view enabling finishing to meet the highest quality standards (Q4). And no cable means no tripping hazards.

ULA 14.4-18 LED & SLA 14.4-18 LED - Cordless Portable Lamps

- Robust die-cast aluminium housing is ideal for use on construction sites.
- Rotatable hook integral on both lamps for safe suspension.
- Compact and practical for versatile use.
- Compatible with all Metabo 14.4 and 18 volt Li battery packs.

BSA 14.4-18 LED - Cordless Site Spotlight

- With 18 LEDs for extensive and uniform illumination of the work area.
- 2 lighting modes: very bright and comfortable daylight.
- Robust and with a long service life for demanding applications on construction sites. Housing and lens can be cleaned with a damp cloth.
- Minimum heat generation for safe handling during continuous operation.
- Compatible with all Metabo 14.4 and 18 volt Li battery packs.

Cordless Inspection Lamp SLA 14.4-18 LED

Lamp head can be turned and swivelled to almost infinite lighting positions.

More on page 120

Cordless Portable Lamp ULA 14.4-18 LED

Lamp head can be indexed and locked in 12 positions.
FOR CUTTING AND FITTING WORK IN DRYWALL CONSTRUCTION. THE NEW CORDLESS MT 18 LTX MULTI-TOOL.

Whether preparing cut-outs for switches and sockets or making changes to the stud frame, a multi-tool is essential in drywall construction. The new MT 18 LTX is a major addition to our cordless Pick+Mix system and can be combined with our proven 18 volt battery packs and charging units.

- Durable Metabo battery packs and powerful drive for quick work progress.
- Even more flexible combinations thanks to its compatibility with other manufacturer’s accessories.
- Replace accessories easily and quickly without the use of tools.

Perfect Mix of Durability and Ergonomics: The New 1,020W to 1,600W Stirrers

With four models it means we can provide a stirrer for your every need. From the compact 1,020 watt single speed model through to the powerful 1,600 watt model with 2-speed gearbox.

- Flexible rubber cover over the on/off switch protects against dirt and increases the functional reliability.
- Strong rubber corners protect against potential damage from impacts and also provides slip-resistant support when leaning it against walls.
- Available in 4 versions: with single speed gearbox (RWE 1010 and RWEV 1200) or 2-speed gearbox (RWEV 1200-2 and RWEV 1600-2).

FOR ROUGHING AND THE FINAL FINISH: DISC SANDER WITH DUAL ORBIT

Only available from Metabo: the patented dual orbit adjustment. Select between high removal (coarse finishing) and optimal surface quality (fine finishing) depending on the application

- Wide range of applications possible with a single machine thanks to the dual orbit (6.2 and 2.8 mm)
- Dust-proof ball bearings for a long machine service life.
- Effective removal of sanding dust by connecting an all-purpose vacuum cleaner.
- TurboBoost: employ additional power reserves for maximum removal.

Maximum productivity with the right accessories

Best results with a precisely aligned system: machine, sanding disc, and the matching Metabo vacuum cleaner solution.

MORE ON PAGE 92

Maximum productivity with the right accessories

Our combination hammers are ideal for hammer drilling, chiselling and drilling in wood or metal. The full-wave electronics lets you work efficiently at a speed that is both appropriate for the material, and one which remains constant under load.

- Immediate switch between the SDS-plus hammer chuck and quick-action keyless chuck for straight shank drills thanks to the Metabo Quick system.
- Metabo S-automatic torque limiting clutch for maximum user protection. Automatic drive disconnection when the drill bit stops unexpectedly.

THE FLOORERS RANGE: MAKING WORK EASIER WITH EXCELLENT RESULTS.

Our vision of cordless construction sites has almost become a reality when installing floors: the renowned cordless assortment for drilling and fixing has long since been joined by powerful circular saws and jigsaws. We have now also extended our 18 volt product range with a versatile multi-tool and a powerful crosscut saw specifically for floor installation.

**KGS 18 LTX 216**
Cordless Crosscut Saw
Precise cutting of floor panels or skirting boards with up to 400 cuts in laminate from a single battery charge.

**TS 216 Table Saw**
The lightest table saw by far, with trolley function and integrated stand, ideal for longitudinal (rip) cuts.

**MT 18 LTX Multi-Tool**
Essential for fitting and modification tasks in the flooring sector – new and compatible with the Metabo 18 volt cordless system.

**STA 18 LTX 140 Cordless jigsaw**
Ideal for contours. Extremely powerful and fast.

**KHA 18 LTX Cordless Combination Hammer**
Essential for fitting and modification tasks in the flooring sector – new and compatible with the Metabo 18 volt cordless system.

**Construction site compressor**
Power 400-20 W OF
For powering nailing or stapling guns, particularly mobile and robust and ideal for use on construction sites.

**Renovation Grinder RS 17-125**
For the powerful removal of tough adhesive residues or hard screed – perfect in combination with a suction device (details see page 34-35)
400 POWERFUL CUTS FROM ONE CHARGE: KGS 18 LTX 216 CORDLESS CROSSCUT SAW

Even powerful machines such as crosscut saws can be battery powered as proven by the unique cordless KGS 18 LTX 216: the Ultra-M technology together with a 5.2 Ah battery pack ensures maximum duration when cutting your floor panels or skirting boards.

- Safe workpiece support thanks to extendable table width extensions which are removable on the left & right to accommodate long panels, boards, etc.
- Line laser and LED work light with energy-saving automatic switch-off.
- Integrated dust funnel with chip collection bag for effective wood dust collection.
- The powerful Metabo motor with overload capacity delivers high speeds of up to 4,200 rpm ensuring a high cutting speed comparable with mains powered crosscut saws (47.5 m/s).
- Only from Metabo: the energy-saving automatic shutoff for lasers and LEDs is activated 2 minutes after the last saw cut. Both can then be easily reactivated by touching the saw (vibration sensor) within 30 minutes. This makes sure that most of the battery charge is used for sawing!

Practical: single-handed transport
Mobility on the construction site is currently a hot topic. The cordless KGS 18 LTX 216 is both cordless and comfortable. The central handle allows the saw to be transported using only one hand.

Practical: single-handed transport

Up to 400 cuts per charge thanks to the 5.2 Ah battery pack.

The powerful Metabo motor with overload capacity delivers high speeds of up to 4,200 rpm ensuring a high cutting speed comparable with mains powered crosscut saws (47.5 m/s).

Maximum productivity with the right accessories

- The high quality circular saw blade for the cordless crosscut saw delivers excellent cutting performance:
  - "precision cut classic" HW/CT 216 x 30, 40 WZ Art. No. 628065.
- Integrated dust funnel with chip collection bag for effective wood dust collection.

Number of cuts per 5.2 Ah battery pack:
- soft wood, KHV 80 x 10 mm: 200
- Laminate 185 x 9 mm: 400
- Wood flooring, hardwood 140 x 22 mm: 140
- Decking boards, WPC 140 x 22 mm: 140

TS 216: THE LIGHTEST TABLE SAW WITH INTEGRATED STAND AND TROLLEY FUNCTION.

The light weight (28.8 kg), compact dimensions and single-handed transportability make the TS 216 the perfect saw for the construction site. The torsion-resistant tubular frame design ensures particularly precise cuts. The optimised two-point chip extraction also reduces the dust pollution in your work area.

Precision meets safety:
the oversized support table with extendable width extension ensures the safe accommodation of large workpieces. A motor brake stops the saw blade within 3 seconds. A significant improvement in safety and comfort: the no-volt release switch prevents any unintentional start-up after a power failure.
FOR ALL FLOORING ADAPTATION AND MODIFICATION WORK: THE NEW CORDLESS MT 18 LTX MULTI-TOOL

Whether cutting back a door frame or for cut-outs in laminate or parquet: a multi-tool is essential in flooring. The new MT 18 LTX is a major addition to our Pick+Mix system and can be combined with our proven 18 volt battery packs and charging units.

- Maximum work progress thanks to the durable Metabo battery pack and efficient drive.
- Precise cuts and optimal ease of use thanks to an ultra-sleek handle and spring-supported saw blade guide.
- Tool-free replacement of the saw blades with the Metabo Quik System.

FOR MODIFICATION WORK: OUR CORDLESS JIGSAW ASSORTMENT.

The cordless jigsaws are perfectly designed for the high loads and stresses that arise when machining various woods and floor panels and retain their speed under extremely high loads. The stable design and the full cordless power with Ultra-M technology guarantee precise cuts and high endurance.

- Precise cuts.
- Optimal ease of use.
- Ultra-sleek handle.
- Spring-supported saw blade guide.
- Tool-free replacement of saw blades with Metabo Quick System.

AS POWERFUL AS A MAINS MACHINE: THE KHA 18 LTX CORDLESS COMBINATION HAMMER.

Ideal for dowel drilling to join skirting boards: the Cordless Combination Hammer KHA 18 LTX combines power and ease of use. With the best stroke impact energy to weight ratio in the 18 volt class, it is as powerful as a mains powered machine but without the restrictions of a cable.

- Vario (V)-electronics for customised speed selection best suited to the material.
- Integrated working light to illuminate the workplace.
- Ultra-M technology for highest performance, gentle and efficient charging, optimum energy utilisation and long service life.
- Battery packs with capacity display for checking the charge status.

IDEAL FOR HARSH CONSTRUCTION SITE APPLICATIONS: THE INNOVATIVE COMPRESSOR RANGE.

Metabo provides a comprehensive assortment of oil free compressors as mobile drives for your compressed-air tools. This ensures reliable start-up even at cold temperatures (< 5 °C). Large, rubber-coated wheels and a pull or carry handle facilitate transport to the construction site.

- Easy transport in any car thanks to the practical and compact design.
- Well-protected by their stable tubular frame.
- Power 280-20 W OF and Power 400-20 W OF compressors each have an attachment for MetaLoc cases, and can accommodate other conventional cases and boxes on the market.

IDEAL FOR MODIFICATION WORK: OUR CORDLESS JIGSAW ASSORTMENT.
TILE BY TILE: WELL PREPARED WITH THE NEW PRO ASSORTMENT.

Large wall and floor tiles are the trend. Their installation requires an experienced specialist and special tools such as our oversize diamond cutting system. The new renovation grinders and planers are also robust and handy devices for removing adhesive residues and surface irregularities.

Diamond cutting system
The robust cutting system for screed renovation and tile cutting. Effective dust extraction together with ASR 35 ACP vacuum cleaner.

Suction system
Automatic switch-on and automatic filter cleaning enables uninterrupted operation when used for extraction, or it can simply be used to clean the construction site.

Renovation Grinder
Extremely effective removal of existing flooring surfaces or the preparation of subsurfaces coupled with a Metabo suction device.

Stirrers
Four versions available to stir tough or heavy mixtures such as tile adhesive or lighter liquid levelling compounds.

RF 14-115 Renovation Planer
Quick, easy and low-dust removal of adhesive remains on screened or plaster, or old coatings on walls, ceilings and floors.

KHE 3251 Combination Hammer
From removing old tiled sections to installing fittings in the bathroom or kitchen. With or without a mains connection.

W 18 LTX 125 Quick Cordless Angle Grinder
Powerful and extremely flexible thanks to the cordless operation: perfect for tiling installations and modifications.

New: Compact Angle Grinder W 9-125 Quick
Ultimate powerful angle grinder with extremely small body circumference. Cordless cartridge gun quickly, cleanly and conveniently apply silicon joints using the cordless drive.

New: Cordless Multi-Tool 18 LTX
The ideal tool for tile repairs or joint renovation.
THE NEW DIAMOND CUTTING SYSTEM: PRECISE AND FAST.

The integrated protective suction cover makes our diamond cutting system the ideal solution for tile cutting or crack and joint repairs. A cutting depth of up to 27 mm means that you can easily, quickly and precisely cut all conventional tiles, including oversize tiles.

- Consistently high suction with automatic filter cleaning using the ASR 35 M ACP suction device enabling continuous and uninterrupted work. **MORE ON PAGE 77**
- Laser-welded diamond cutting disc with 12 mm high segments for a high service life and quick cuts. **MORE ON PAGE 103**

CLEAN-CUT: ASR 35 M ACP VACUUM CLEANER.

The automatic filter cleaning in our all-purpose vacuum cleaner lets you work without interruption and with its automatic switch-on feature it makes the perfect partner for our power tools. As a certified safety vacuum cleaner, the ASR 35 M ACP is approved for L, M and H class hazardous dusts, and is naturally also perfectly suited for general cleaning around the construction site.

- A coordinated Metabo system consisting of power tools and a suction device guarantees higher efficiency and reliability.
- Dust extraction protects the lungs and reduces the risk of respiratory diseases.
- Reduced cleaning expense with less dust on the construction site and satisfied customers frequently lead to a rise in recommendation rates.

Quick work progress thanks to the marathon motor providing up to 50 % more torque and 20 % higher overload capacity.

Optimised flow channel for especially effective suction performance.

Stable and gentle operation thanks to the robust metal base plate incl. guide rollers (guide base can be removed without the use of tools).

Aerodynamic suction hood made from anti-static PVC with plunge function.

Practical storage areas for both accessories and tools.

Power socket for power tools with automatic start/shutdown of the vacuum.

Stable and easy to move thanks to the castors with locking brakes and large wheels.

Automatic "AutoCleanPlus" filter cleaning for permanently high suction performance.
PREPARATION SYSTEMS: 
THE ROBUST RENOVATION GRINDERS.

The Renovation Grinder RS 17-125 has a powerful 1,700 watt motor and huge torque that is ideal for grinding off old coatings, and it can work close to edges, meaning no more time-consuming reworking.

- **1700 watt motor** with high overload capacity, ideal for tough continuous use on construction sites.
- **Robust aluminium protective cover.**
- **Spring-loaded brush skirt** for optimal suction at every segment height.
- **Folding, undetachable segment** for grinding near edges.
- **Ergonomic handle** adjustable in 5 positions for the ideal working position.

Floor and tile laying

Metabo renovation grinders, cup wheels and vacuum cleaners are perfectly compatible and provide optimal work results with effective suction.

- **Diamond cup wheel (Ø 125 mm)** "Concrete professional" for particularly hard substrates, e.g. concrete.
- **Diamond cup wheel (Ø 125 mm)** "abrasive professional" for hard coatings, e.g. tile adhesives, screed.
- **Cup wheel (Ø 125 mm)** "PKD professional" for soft coatings, e.g. parquet adhesive/bitumen.

Renovation Grinder RS 14-125

Extremely practical and compact. With adjustable speed that is particularly beneficial for heat-sensitive coatings and adhesive residues.

NEW
SMOOTH OPERATION: HIGH-PERFORMANCE STIRRERS.

Selecting the right stirring system can save a lot of time when mixing levelling compounds or tile adhesives. Our stirrers and their perfectly compatible agitator paddles can easily perform all your mixing requirements.

- Side cable exit reduces the risk of a cable break.
- Flexible rubber cover protects the on/off switch against dirt.
- Agitator paddle socket with M14 thread.
- Cover over the motor housing protects against water and dirt.
- Circumferential rubber impact protection protects the machine if dropped or left upright against a wall.
- Ergonomically positioned handles for reduced effort when mixing highly viscous material.

All stirrers are equipped with a universal agitator paddle ex-factory. The assortment overview of additional agitator paddles is available on page 93.

Its powerful triple reduction gearbox means that the RF 14-115 guarantees the quick removal of plaster and adhesive residue on screed. The perfect accessory: The ASR 35 M ACP vacuum cleaner.

UNBEATABLE: BEST IN ITS CATEGORY AMONG THE 3 KILO COMBINATION HAMMERS.

Powerful, robust and versatile: the KHE 3251 Combination Hammer guarantees the best drilling and chiselling performance in the 3 kilo category. Its universal application options are possible thanks to the hammer stop (for drilling without hammer action), the rotation stop (for chiselling) and the forward and reverse function. The allrounder for tilers!

- Integrated Metabo VibraTech (MVT) anti-vibration system for vibration reduction.
- Metabo Quick system for quick change between SDS Plus hammer chuck and quick-action keyless chuk.
- Vario (V)-electronics for working at customised speeds to suit the workpiece material.

Maximum productivity with the right accessories:

- Tile chisel.
- Pro 4 Premium drills.
- More chisels and SDS drills on page 89-91.
CONVENIENT AND EASY GROUTING:
THE VERSATILE KPA 10.8 CARTRIDGE GUN.

The cordless cartridge gun’s stable design and variable speed makes it easy to feed out even the most viscous materials.

- Quick, easy change between foil bags and cartridges.
- No dripping thanks to automatic retraction of the push plate after trigger release.
- All-metal gear unit for a long service life.
- Available for cartridges or foil bags (400 or 600 ml).

Ideal for versatile tasks when laying tiles: the new W 9-125 Quick impresses with ergonomic perfection due to its slimmer body. Perfect for fitting activities with diamond cutting discs, for cutting corner and stop rails and naturally also for drilling using diamond core tile drill bits.

- Tool-free disc change by means of the spindle stop and the quick-locking nut.
- Electronic overload protection, soft start and no-volt release switch ensure absolute safety.

PRACTICAL AND POWERFUL:
THE W 9-125 QUICK COMPACT ANGLE GRINDER.

Maximum productivity thanks to the Metabo marathon motor with premium power density.

- Slim housing for optimal handling.
- Recoil-free cutting thanks to the Metabo S-automatic torque limiting clutch.
- Disc change without adhesive with the Metabo Quick System.
- Toolless adjustment of the protective cover.

The ideal companion for repair work on tile flooring or for joint renovation: a multi-tool is essential for tilers. The new MT 18 LTX can be combined with our proven 18 volt battery packs and charging units and is a major addition to our Pico-Mix system.

- Durable Metabo battery packs and powerful drive for quick work progress.
- Even more flexible combinations thanks to its compatibility with other manufacturers’ accessories.
- Easier and faster tool change.

MOBILE MULTI-TALENT FOR EVERY SITUATION.
THE NEW MT 18 LTX CORDLESS MULTI-TOOL.

Durable Metabo battery packs and powerful drive for quick work progress.

- Durable Metabo battery packs and powerful drive for quick work progress.
- Even more flexible combinations thanks to its compatibility with other manufacturers’ accessories.
- Easier and faster tool change.

Cutting without the cable:
THE CORDLESS ANGLE GRINDER WITH THE SPECIAL TWIST.

The W 18 LTX 125 Quick is a powerful and robust cordless angle grinder for all tile fitting and modification tasks. It offers perfect handling thanks to its sleek design and outstanding ergonomics. The bonus: the rotateable battery pack provides greater versatility meaning you can frequently access even hard-to-reach places.

- Tool-free disc change by means of the spindle stop and the quick-locking nut.
- Electronic overload protection, soft start and no-volt release switch ensure absolute safety.

Maximum productivity thanks to the Metabo marathon motor with premium power density.

- Slim housing for optimal handling.
- Recoil-free cutting thanks to the Metabo S-automatic torque limiting clutch.
- Disc change without adhesive with the Metabo Quick System.
- Toolless adjustment of the protective cover.

EXPERTISE IN ROOFING AND TIMBER CONSTRUCTION: COMPLETE SOLUTIONS FOR-professionals.

The treatment and production of beams and wooden components is increasingly being outsourced to stationary processing centres. At the same time, on-site assembly is becoming more important and places great demands on every craftsman, especially in the area of structural thermal protection, insulation technology and air tightness. This construction requires machines that are mobile, robust and precise.

- **TS 254 - Table Saw**
  For beams, board and wood cutting of any kind. Extremely robust and flexible, and mobile thanks to the integrated trolley function.

- **Power 400-20 W OF – Site Compressor**
  Particularly mobile and robust compressors for a variety of air tools. Top cover links with the MetaLoc case system for air tool storage.

- **STA 18 LTX 140 Cordless Jigsaw**
  A must in timber work: perfectly designed for high loads when working on a wide range of timbers.

- **KS 55 FS Circular Saw**
  Compact crosscut saw with a cutting depth of up to 55 mm and for mitre cuts up to 47° with undercut.

- **BS 18 LTX Quick Cordless Drill / Screwdriver**
  Maximum torque for the most difficult fixing tasks in timber work or for roof installation.

- **STA 18 LTX 140 Cordless Jigsaw**
  A must in timber work: perfectly designed for high loads when working on a wide range of timbers.

- **BS 18 LTX Quick Cordless Drill / Screwdriver**
  Maximum torque for the most difficult fixing tasks in timber work or for roof installation.

- **Power 400-20 W OF – Site Compressor**
  Particularly mobile and robust compressors for a variety of air tools. Top cover links with the MetaLoc case system for air tool storage.

- **STA 18 LTX 140 Cordless Jigsaw**
  A must in timber work: perfectly designed for high loads when working on a wide range of timbers.

- **BS 18 LTX Quick Cordless Drill / Screwdriver**
  Maximum torque for the most difficult fixing tasks in timber work or for roof installation.

- **Power 400-20 W OF – Site Compressor**
  Particularly mobile and robust compressors for a variety of air tools. Top cover links with the MetaLoc case system for air tool storage.

- **STA 18 LTX 140 Cordless Jigsaw**
  A must in timber work: perfectly designed for high loads when working on a wide range of timbers.

- **SSW 18 LTX 400 BL Cordless Impact Screwdriver**
  With extremely high torque and minimum recoil.

- **Power 400-20 W OF – Site Compressor**
  Particularly mobile and robust compressors for a variety of air tools. Top cover links with the MetaLoc case system for air tool storage.

- **STA 18 LTX 140 Cordless Jigsaw**
  A must in timber work: perfectly designed for high loads when working on a wide range of timbers.

- **BS 18 LTX Quick Cordless Drill / Screwdriver**
  Maximum torque for the most difficult fixing tasks in timber work or for roof installation.

THE MEASURE OF MOBILITY: TS 254 TABLE SAW

The perfect companion in professional timber work and interior construction: the new TS 254 Table Saw is extremely light and mobile thanks to the integrated trolley function. It is also very compact when the stand is folded up, making it ideal for space-saving storage. During transport the cable and all attachments have a dedicated storage place on the machine.

- High torque motor with electronic overload protection.
- Safe no-volt release switch prevents unintentional startup after a power cut.
- Soft start for a long service life of motor and drive.
- Precise saw blade angular tilt via the stepped angle guide and with automatic reset to 0–45° following an undercut of −1.5 to 46.5°.
- Easy saw blade change thanks to the spindle lock, and the riving knife can be retracted for concealed cuts and safe transport.
- Dual port extraction for clean operation.

Extra large support area thanks to an extendable table width extension.

Integrated stand made from stable die cast aluminium for secure positioning on site, or with feet folded, a secondary lower working height ideal for flooring work.

Precise parallel guide with double clamp and quick-lock makes work a breeze.

Quick stop of the saw blade in just 3 seconds thanks to the motor brake.

Integrated stand

RELIABLE APPLICATION: COMPRESSORS AND STAPLE GUNS.

Metabo provides compressors in four performance categories as a mobile drive unit for your compressed air tools, and all four are oil-free. This ensures a reliable startup, even at cold temperatures (< 5 °C). A wide range of perfectly compatible compressed air tools is also available.

- Practical, compact and easy to transport to the workplace in any car.
- For the convenient transportation of other tools: Power 280-20 W OF and Power 400-20 W OF compressors each come with an attachment for MetaLoc cases and other conventional storage cases and boxes on the market.

All-round protection: sensitive parts such as fittings and couplings are installed inside the robust frame.

With lifting shackles for transport via a construction crane.

The large rubber wheels are ideal for transport on construction sites.

Unique: with their variable pull and carry handle for convenient transportation.

DKG 114/65 - Compressed Air Staple Gun
- Depth control via thumbwheel for a flush surface finish.
- Contact fuse prevents unintentional triggering.
- Protective rubber shoe that prevents damage to sensitive surfaces.

Maximum productivity with the right accessories

Saw blades for every application
Whether soft wood, hard wood or board material: Metabo provides high-quality saw blades for longitudinal or cross cuts, for quick cuts as well as premium cutting quality.

Maximum productivity with the right accessories

Accessories for all compressors and compressed air tools can be found in the main Metabo catalogue.
FOR QUICK REMOVAL: THE ASE 18 LTX CORDLESS SABRE SAW

Our cordless sabre saw is the best choice for many pros when performing renovation work: for cropping or removing beams, square timbers, building panels and pipes. The sleek and lightweight design features a softgrip handle for comfortable working in any position. It is also the safe alternative to using chainsaws on a roof.

- Vario (V)-electronics for comfortable working at customised stroke speeds to suit the material being cut.
- Saw blade rotatable through 180° for working comfortably overhead.
- Battery packs with capacity display for checking the charge status.

Ultra-M technology for highest performance, gentle and efficient charging, optimum energy utilisation and long service life.

MORE ON PAGE 112

POWERFUL, PRECISE, FAST: THE CORDLESS JIGSAW RANGE.

Our powerful cordless jigsaws are perfectly designed for working on various timbers, and maintain their cutting speed even under extremely high loads thanks to their VTC electronics. This makes quick cuts possible for beams up to 140 mm thick. To make life easier, two integrated LEDs illuminate the cutting line for you to follow.

- Material-matched cutting thanks to the variable stroke rate, pendulum stroke and close saw blade guide with spring support.
- Simple bevel cuts thanks to toolless adjustable footplate with angular rest points.
- Metabo Ultra-M technology for highest performance, gentle efficient charging, optimum energy utilisation and long service life.
- Battery packs with capacity display for checking the charge status.

Cuts up to 50 metres in 19mm chipboard on a single 5.2 Ah charge.

Adjustable depth guide for the ideal utilisation of the entire saw blade, and for support in diverse applications such as plunge cuts.

Extremely practical and comfortable thanks to slim handle design and softgrip surface.

MORE ON PAGE 113

Metabo jigsaw blades are available for all areas of application:

- for pipes, sheets, profiles ...
- for metal, timbers, chipboard, building panels, plasterboard ...
- for bricks, aerated concrete, fibre-reinforced materials, plastics and composite materials ...

You can find more saw blades on page 114.

Maximum productivity with the right accessories

Metabo cordless or mains powered sabre saws. More info on page 113.

Metabo cordless or cable jigsaws. More info on page 113.

Metabo cordless or cable jigsaws. More info on page 113.

Maximum productivity with the right accessories

More info on page 113.
EXTREMELY FAST, EXTREMELY POWERFUL: THE BS 18 LTX QUICK CORDLESS DRILL / SCREWDRIVER.

Full mobility during roof installation or timber work: wherever quick drilling and powerful fixing is required, our cordless drill / driver with its Metabo 4-pole motor, is the right choice. The activation of pulse-mode provides additional assistance when removing stubborn or damaged screws. The integrated work light illuminates the contact area.

- Metabo Ultra-M technology for maximum performance, gentle and efficient charging, optimum energy utilisation and long service life.
- Battery packs with capacity display for checking the charge status.
- PowerX3 torque attachment for driving longer larger screws in tougher hardwoods: timber screws up to max. 14 x 800 mm.

CUSTOMISED DRILLING AND FIXING: SINGLE OR 2 SPEED MACHINES.

The BE 75 Quick with single speed impresses with its exceptionally high torque ideal for heavy-duty timber drilling and fixing tasks.

- Metabo S-automatic torque limiting clutch for the mechanical uncoupling of the drive should the drill bit snag or stop unexpectedly.
- High durability and optimal heat dissipation thanks to the robust die cast aluminium gear housing.
- Rotating carbon brush bridge for maximum performance even in anti-clockwise rotation, e.g. when removing stubborn screws.

The BE 1300 Quick with a 2-speed gearbox provides universal application options with a wide range of speeds. Both are equipped with the Metabo Quick System as standard, for rapid tool change.

Toolless quick change for flexible working thanks to the Metabo Quick System.

Robust and durable die cast aluminium gear housing for optimum heat dissipation.

- ¼" hexagon socket in the machine spindle to accommodate screwdriver bits. Ideal for tight spaces.
- Quick change drill chucks for straight shank drills of 1.5–13 mm diameter and quick change bit holder for ¼" hexagon socket screwdriver bits.
- Special quick change angle adapter for use in tight and awkward places.
- The high torque PowerX3 attachment triples the power for extreme applications.

MORE ON PAGE 84
THE NEW DRYWALL SCREWDRIVERS: SPECIALISTS IN FITOUTS.

Precise and fast fixing is required particularly in roof installation and timber construction. Our new cordless or mains powered drywall screwdrivers are a perfect and compact solution.

- Precise fixing thanks to the adjustable depth stop control and silent claw clutch.
- Fully removable depth stop for the quick removal of screws or when switching between magazine application and individual fixing.
- High torque or high speed, you can choose from six mains or cordless devices.

MORE ON PAGE 80

THE ALLROUNDER IN TIMBER CONSTRUCTION: CROSSCUT SAW KGS 315 PLUS.

The KGS 315 Plus delivers outstanding cutting performance and enables precision cuts on site. Its traction function also makes it ideal for wide workpieces. A second suction point directly at the cutting interface also provides optimal chip extraction.

- Full wave electronics for high torque and speed control, e.g. when cutting aluminium profiles and plastics.
- Metabo Quick System for changing saw blades without tools.
- Fast and precise setting of commonly used angles using stop points.
- Depth stop for easy creation of grooves.
- Easy transport thanks to ergonomically-designed handles and locking saw head.
- Material clamp to fasten the workpiece from above or from the front, plus side-adjustable stops for safe cutting.
- Full-out table width extensions made from die cast aluminium.

MORE ON PAGE 80

FITTS ALL GUIDE RAILS: THE KS 55 FS CIRCULAR SAW.

The KS 55 FS with its universal application provides consistently precise cuts and can be mounted on Metabo guide rails and all other conventional systems without adapters. The stable die cast aluminium base plate guarantees a secure position during work and supports clean and precise guidance.

- Ergonomic and safe handling thanks to the softgrip surfaces.
- Cutting depths up to 55 mm, bevel cuts up to 47°, angle lock at 45°.
- Connection for dust extraction available.
- Metabo guide rails, circular saw blades and cutting devices can be found on page 110 / 111 and 77.

MORE ON PAGE 110

THE FIXING KING IN TIMBER CONSTRUCTION: THE CORDLESS SSW 18 LTX 400 BL IMPACT SCREWDRIVER.

High torque machine with low kick-back: the SSW 18 LTX 400 BL Cordless Impact Screwdriver. The unique Metabo brushless motor ensures quick progress and with twelve speeds or torque levels, it can be adjusted perfectly to every application.

- Practical robust machine with ½" square drive to accept a wide range of impact sockets.
- Only 1.9 kg, with 400 Nm of torque.
- Metabo Ultra-M technology for maximum performance, gentle and efficient charging, optimum energy utilisation and long service life.
- Battery packs with capacity display for checking the charge status.

FULLY EQUIPPED: EVERYTHING YOU NEED FOR WALLS, FASCIAS AND WINDOWS.

Fascias on existing buildings not only need fresh paint as weather protection, they also require energy-saving thermal protection. A composite thermal insulation system is applied to rendered, concrete or tiled fascias for this purpose. We offer powerful cordless and mains powered Metabo tools for these activities.

RF 14-115
Renovation Planer
For the quick removal of plaster, screed and old coatings. With precise depth adjustment and effective dust extraction.

Combination
Hammers
From the removal of old coatings to the precise drilling of dowel holes, available as cordless or mains powered machines.

BS 18 LTX BL
Cordless Drill / Screwdriver
Quick and precise and perfect for tight spaces, or just for ultimate power.

SSD 18 LTX 200
Cordless Impact Screwdriver
Ideal for fascia joints: only 1.6 kg with 190 Nm of torque.

RS 14-125
Renovation Grinder
Quickly and cleanly removes coatings, hard cement plaster, concrete and adhesive remains.

Diamond cutting system
The robust cutting system for renovating cracks and joints as well as removing sections.

ASE 18 LTX Cordless Sabre Saw
Universal application, for example removing old window frames.
NEW: stirrers
For mixing plaster, reinforcement adhesive and fascia paint.
Impact drills
Optimal performance thanks to a high impact rate of 58,000 rpm and high torque of up to 46 Nm.
Cartridge Gun KPA 10.8
Perfect for sealants and adhesive material.

Suction systems
Automatic switch-on and automatic filter cleaning enables operation without interruptions or simply use it to clean the construction site.

LF 724 S Paint Remover
Exclusive from Metabo: for removing paint and varnish from wooden surfaces such as doors and window frames and sills.

FULLY EQUIPPED: EVERYTHING YOU NEED FOR WALLS, FASCIAS AND WINDOWS.

Fascias on existing buildings not only need fresh paint as weather protection, they also require energy-saving thermal protection. A composite thermal insulation system is applied to rendered, concrete or tiled fascias for this purpose. We offer powerful cordless and mains powered Metabo tools for these activities.
SAVE TIME AND ENERGY: 
THE NEW RENOVATION PLANER

The problem-solver with effective extraction for easy fascia renovation: our new RF 14-1 15 Renovation Planer with its high-performance triple reduction gearbox ensures the maximum removal of plaster, adhesive remains on screed or old coatings. The speed can be adjusted and is ideal for heat-sensitive coatings.

- Quick progress thanks to a 115 mm cutting head diameter and 15 carbide milling teeth.
- Easy to manoeuvre thanks to the robust metal ringed guide plate.
- Fully adjustable planing depth between 0–6 mm for the specific removal of coatings, paints and plaster.
- Robust and durable thanks to the aluminium flange, sealed flange bearing and special dust guidance.

MORE ON PAGE 86

IDEAL FOR FASCIA WORK ESPECIALLY ON 
SCAFFOLDING: THE MOBILE CORDLESS 
KHA 18 LTX COMBINATION HAMMER.

Combines power and ease of use: with the best stroke impact energy to weight ratio in the 18 volt category, this combination hammer is as powerful as a mains machine. Ideal for work on fascias, joining composite thermal insulation systems or scaffolding anchors and for chiselling work when replacing old windows.

- Vario (V)-electronics for comfortable work at customised speeds to suit the application material.
- Integrated working light to illuminate the application area.
- Integrated eyelet for a carrying belt providing convenient transportation and securing against falls.
- Ultra-M technology for maximum performance, gentle and efficient charging, optimum energy utilisation and long service life.
- Battery packs with capacity display for checking the charge status.

Walls, Fascias, Windows

Dust extraction
Metabo provides robust portable extraction systems with power take offs providing automatic switch-on for electric tools, ideal for site work. The automatic filter cleaning ensures a continuous and optimal extraction performance.
Available for use with dust classes L, M and H; the range includes safety vacuum cleaners with test certificates for hazardous dusts.

Which tooth shape is appropriate for which application?

"Pointed" cutting head for harder material, the pointed tooth shape creates a roughened surface.
"Flat" cutting head for softer material, the flat tooth shape creates a smooth surface.

Extremely long operating life with every charge thanks to the 5.2 Ah battery pack.

Metabo S-automatic torque limiting clutch for the mechanical uncoupling of the drive should the drill bit snag or stop unexpectedly.

Universal application options with a hammer stop for drilling in rotary only mode and rotation stop for chiselling.

Metabo cordless or mains powered Combination Hammers. More info on page 86.

PERFECT FOR EVERY FASCIA ANCHOR SYSTEM: THE BS 18 LTX BL QUICK.

This drill / screwdriver sets new standards in the premium range: the unique Metabo brushless motor ensures that you achieve outstanding results when drilling and fixing. You can also get into corners and tight spaces thanks to the compact design and options such as the angle attachment. Our practical Quick System also makes it extremely versatile.

- Selectable “pulse” mode for the removal of difficult screws and spot-drilling on smooth surfaces such as tiles.
- Electronic torque selection with increased precision for accurate working thanks to the ‘Precision Stop’.
- Ultra-M technology for maximum performance, gentle and efficient charging, optimum energy utilisation and long service life.
- Battery packs with capacity display for checking the charge status.

FASCIAS AND CLADDING MADE EASY: THE SSD 18 LTX 200.

Weighing only 1.6 kg and with 150 Nm of torque, this impact screwdriver has exceptionally high torque and minimum recoil. The extremely compact and practical cordless impact screwdriver has an integrated hexagon socket in the spindle to provide concentrated power to be applied directly to the screw.

- Optimal heat dissipation and durability thanks to the robust die cast aluminium gear housing.
- Ultra-M technology for maximum performance, gentle and efficient charging, optimum energy utilisation and long service life.
- Battery packs with capacity display for checking the charge status.

More on page 87

The Metabo Quick System.

Change between different applications in just two easy steps thanks to the toolless change system.

- Hexagon socket in the end of the drive spindle for direct insertion of screwdriver bits.
- Quick change bit holder for ¼" hexagon socket screwdriver bits.
- Quick change drill chuck for straight shank drills between 1.5-13mm diameter
- Quick change angle adapter for tight spaces.
- The high torque PowerX3 attachment triples the power for extreme applications.

High torque accompanied by a robust and compact design.

With handy belt hook and bit holder, which can be fixed either on the right or left side.

Maximum productivity with the right accessories.

Metabo provides special screwdriver bits in an impact-resistant design. These new “Impact Bits” have a 70 % longer service life. You can find more info on page 85.
**ALSO SUITABLE FOR HEAT-SENSITIVE COATINGS: RS 14-125 WITH SPEED CONTROL.**

This practical renovation grinder is designed for the fast and clean removal of coatings on hard substrates and for grinding off concrete or hard cement plaster. The combination of the right speed and the matching diamond cup wheel ensures a perfect result.

- Optimal suction results with the spring-loaded brush skirt on the protective cover.
- Grinding close to edges without the need for reworking thanks to a fold-out, undetachable segment.
- Extremely durable thanks to the robust aluminium flange, sealed flange bearing and special dust guidance.
- Toolless adjustment of the bow type handle for safe and uniform guidance.

**PERMANENTLY CLEAN WORKPLACE: THE ASR 35 M ACP VACUUM CLEANER.**

Our proven ASR 35 M ACP Vacuum Cleaner ensures the hazardous dusts generated when grinding or planing end up in the vacuum cleaner and not in your lungs. The automatic filter cleaning guarantees constant extraction without interruptions.

- Significantly higher efficiency and functional reliability when using a compatible Metabo system.
- Effective dust extraction: protects the lungs, guarantees better visibility in the workplace and reduces residual cleaning tasks.
- Cost and time saving with automatic filter cleaning.
- Also available: certified safety vacuum cleaners tested and approved for class L, M & H hazardous dusts.

**ENVIRONMENTALLY FRIENDLY AND FAST: THE UNIQUE METABO PAINT REMOVER LF 724 S.**

Quick paint removal: our paint remover solves the problem of chemical or hazardous removal of paints and varnish on smooth timber surfaces (e.g. stairs, doors or windows). This means that hazardous stripping and the use of acids is no longer required.

- Save up to 70 % more time (compared to other manual methods) by using carbide reversible blades
- Safe for the environment and your health compared to conventional processes.
- Allows you to work near edges.
- Sturdy construction due to the die cast aluminium housing.
- Direct and effective extraction using a Metabo vacuum cleaning system.
STURDY AND LIGHTWEIGHT: THE ASE 18 LTX CORDLESS SABRE SAW.

Its robust construction and the Metabo Ultra-M technology takes the ASE 18 LTX past the point where other tools can no longer cope when removing old windows and door frames. And at only 3.6 kg it is also extremely practical.

- Slim, lightweight machine with softgrip handle for comfortable sawing in every working position.
- Robust die cast aluminium gear housing for optimum handling.
- Vario (V)-electronics for working at customised stroke rates for the application material.
- Saw blade rotatable by 180° for working comfortably overhead.
- Battery packs with capacity display for checking the charge status.

PERFECTED OVER DECADES: METABO IMPACT DRILLS.

The world’s first series produced impact drill was a Metabo and it established our reputation as a manufacturer of durable, robust and sophisticated machines. A prime example: the SBE 1300.

- Optimal performance thanks to the 1,300 watt motor, a high impact rate of 58,000 rpm and high torque of up to 46 Nm.
- Single-sleeve quick-action keyless chuck and spindle stop gear for single-handed tool change.
- Quick work progress due to constant speed under load thanks to the full wave electronics.
- Optimal heat dissipation and durability thanks to the robust die cast aluminium gear housing.
- Metabo marathon motor with patented dust protection for a long service life.
- Metabo S-automatic torque limiting clutch for the mechanical uncoupling of the drive should the drill bit snag or stop unexpectedly.

CONVENIENT AND EASY GROUTING: THE VERSATILE KPA 10.8 CARTRIDGE GUN.

The cordless cartridge gun’s stable design and infinitely adjustable speed makes it easy to professionally apply even the most viscous materials.

- Quick, easy change between foil bags and cartridges.
- No potential dripping thanks to automatic retraction of the push plate.
- All-metal gear for a long service life.
- Available for cartridges or foil bags (400 or 600 ml).

PERFECT MIX OF STURDINESS AND ERGONOMICS: NEW STIRRERS FROM 1,020 TO 1,600 WATTS.

Whether plaster, adhesive or filler: our four models mean that we can provide a stirrer for every need. From the compact 1,020 watt single speed model through to the powerful 1,600 watt 2 speed model.

- Flexible rubber cover on the on/off switch protects against pollution and increases functional reliability.
- The side cable exit reduces the risk of a cable break.
- Stable rubber corners protect against damage resulting from impacts and when laying the machine down on site. Also slip-resistant when leaning against walls.
- Available in 4 versions: Single speed (RWE 1020 and RWEV 1200) or 2-speed versions (RWEV 1300-2 and RWEV 1600-2).

COMPLEX REQUIREMENTS, SIMPLE SOLUTIONS: THE INSTALLATION RANGE.

New technologies such as heat pumps and solar and photovoltaics systems have made installation tasks much more sophisticated and complex. Professionals need compact, robust and practical tools that make their everyday work easier – all in the trusted Metabo quality.

- **MFE 30 Wall Chaser**: Two parallel slits in one operation – the slit is created cutting from top to bottom which also reduces effort.

- **ASE 18 LTX Cordless Sabre Saw**: Universal application for removing old heating and water systems as well as for cutting pipework, square timbers, building panels, etc.

- **KHA 36 LTX Cordless Combination Hammer**: For chiselling out channels and drilling feed lines or mounting points, available as a cordless or mains powered machine.

- **SDS-max Combination Hammers**: For chiselling and drilling applications in concrete and masonry: with integrated Metabo VibraTech anti-vibration system.

- **BS 18 LT Quick Cordless Drill / Screwdriver**: Extremely efficient thanks to the powerful Metabo 4-pole motor. Ideal for work in tight spaces.
ALWAYS ON THE RIGHT TRACK: 
THE POWERFUL MFE 30 WALL CHASER

Equipped with a powerful marathon motor, the MFE 30 cuts two parallel slits in a single operation. The drawing cut from top to bottom saves energy and time, even in hard materials. Perfect preparation for the installation of cables and pipes.

- Metabo marathon motor with patented dust protection for a long service life.
- Particularly low-dust operation thanks to the plunge function.
- Effective extraction together with a Metabo vacuum cleaning system.
- Intelligent overload protection protects the motor from overheating.
- Quick progress due to constant speed even under load thanks to the full wave electronics.
- Prevents unintentional startup after a power cut with a no-volt release switch.
- Wall chasers can also be used for cutting when used with a single diamond cutting disc.
- Metabo S-automatic torque limiting clutch for the mechanical uncoupling of the drive should the drill bit snag or stop unexpectedly.

MORE ON PAGE 105

THE REMOVAL PRO: 
ASE 18 LTX CORDLESS SABRE SAW

At only 3.6 kg and with a comprehensive saw blade range, our cordless sabre saw provides outstanding flexibility for the quick removal of old heating and water pipes or for cutting pipework, square timbers and building panels.

- Slim, lightweight machine with softgrip handle for comfortable sawing in every working position.
- Vario (V)-electronics for comfortable working at customised strokes for the application material.
- Saw blade rotatable by 180° for working comfortably overhead.
- Battery packs with capacity display for checking the charge status.

- Adjustable groove width and cutting depth.
- Adjustable depth guide for the ideal utilisation of the entire saw blade and applications such as plunge cuts.
- Saw blade change without tools with the Metabo Quick System.
- Metabo Ultra-M technology for maximum performance, gentle and efficient charging, optimum energy utilisation and a long service life.
- Maximum productivity with the right system

Metabo provides robust extraction systems for construction sites with automatic switch-on for electric tools and also with automatic filter cleaning ensuring optimised extraction of debris without interruption. The range provides solutions tested and certified for L, M and H class hazardous dusts.

Metabo sabre saw blades are available for all application areas:

- for pipes, sheets, profiles ... 
- for metals, timbers, chipboards, building panels, plasterboard ... 
- for bricks, aerated concrete, fibre-reinforced materials, plastics, composite materials ...

You can find a detailed overview on page 113.

MORE ON PAGE 113
CORDLESS POWER PACK: KHA 36 LTX COMBINATION HAMMER.

Drilling with and without impact or chiselling. The KHA 36 LTX provides three functions in a single machine and is ideal for chiselling channels or drilling feed lines and dowel holes. The Metabo marathon motor with its perfected impact mechanism provides the best drilling performance in the 3 kg cordless category.  

- Metabo Quick System: quick change between SDS Plus hammer chuck and quick-action keyless chuck for drilling in wood and metal.  
- Robust high-performance impact mechanism with precision bearings in a die cast aluminium gear housing.  
- Ergonomic housing shape for chiselling tasks without a side handle.

VERSATILE DRILLING AND CHISELLING: THE KHE 76 SDS MAX COMBINATION HAMMER.

Whether drilling to feed through pipelines or performing chiselling tasks to remove masonry: the KHE 76 can be used for a variety of applications and impresses with its strong performance. Together with our SDS max accessories (drills, chisels, carbide milling and hammer drill bits) it is the ideal tool for any installation activity.

- Metabo S-automatic torque limiting clutch for the mechanical uncoupling of the drive should the drill bit snag or stop unexpectedly.  
- Electronic soft start enables precise spot-drilling.  
- Optimal heat dissipation and durability thanks to the robust die cast aluminium gear housing.  
- The Metabo VibraTech system (MVT) reduces vibrations by over 30%.  
- Lockable switch for trouble-free chiselling in continuous operation.  
- Vario-Tacho-Constamatic (VTC) full wave electronics for working at customized speeds that remain constant even under load.

POWERFUL DRIVE, QUICK CHANGE: THE BS 18 LT QUICK CORDLESS DRILL / SCREWDRIVER

The powerful Metabo 4-pole motor and the innovative Ultra-M technology make the BS 18 LT Quick extremely efficient and capable. The Metabo Quick System also makes it very versatile: for example, you can use the quick change bit holder and the angular gear to work in very tight spaces.

- Ultra-M technology for maximum performance, gentle and efficient charging, optimum energy utilisation and long service life.

Maximum productivity with the right accessories

A comprehensive range of SDS Max hammer drills and accessories including chisels, carbide and hammer drill bits can be found in our main catalogue.

MORE ON PAGE 88
FOR GARDENING AND LANDSCAPING: EVERYTHING UNDER ONE ROOF AT METABO.

The diverse range of tasks in this segment include the fitment of patio and terrace accessories, laying of slabs and decking, and the building of steps, pathways and stone walls. Our range of tools is equally diverse: from angle grinders to hammer drills, chipping hammers, screwdrivers, mixers and from water and pump technology through to hedge trimmers – robust, durable and many are also available in cordless versions.

KGS 18 LTX 216 Cordless Crosscut Saw
The ideal solution for installing wooden decks with up to 200 cuts in 60x60 square timber from a single battery charge.

STA 18 LTX 140 Cordless Jigsaw
Powerful, precise and fast: designed for working with a range of timbers.

Sabre saws
Robust and versatile allrounder in a cordless or mains version.

WE 26-230 MVT Quick Angle Grinder
For cutting concrete slabs or edging: two-handed angle grinders in three performance categories up to 2,600 watts.

Site pumps
High output, low maintenance: drainage and dirty water pumps for rainwater, ground and site water and dirty water.

SDS combination hammers
For drilling in hard concrete as well as chiselling, and available as a mains powered or cordless machine.

KGS 18 LTX 216 Cordless Crosscut Saw
For drilling in hard concrete as well as chiselling, and available as a mains powered or cordless machine.

Site pumps
Robust and practical, and in four versions: the 2-speed RWEV 1600-2 with 1600 watts of power is recommended for larger quantities of concrete.

W 12-125 Quick Compact Angle Grinder
With the highest power density in its class for quick work progress.

KGS 18 LTX 216 Cordless Crosscut Saw
Perfect for formwork or timber structures with cutting depths of up to 55 mm and mitre cuts up to 47° with undercut.

BS 18 LT Quick Cordless Drill / Screwdriver
Extremely efficient drill / screwdriver with practical Quick System.

Stirrers
Robust and practical, and in four versions: the 2-speed RWEV 1600-2 with 1600 watts of power is recommended for larger quantities of concrete.

W 12-125 Quick Compact Angle Grinder
With the highest power density in its class for quick work progress.

AHS 18-55 Cordless Hedge Trimmer
With 200 % longer service life: rounds out the 18 V devices in the gardening and landscaping segment.
PERFECT FOR CONCRETE: WE 26-230 MVT QUICK.

Developed for the toughest applications: our new two-handed angle grinder is extremely strong and robust thanks to the 2,600 watt Metabo marathon motor. Its rotating back handle makes it ideal for all cutting activities and the patented dust protection ensures a long service life.

- Electronic safety shutdown of the motor if the grinding/cutting wheel jams.
- Long service life due to the electronic overload protection.
- Easy disc change thanks to the spindle stop and quick-locking nut.
- The side handle with vibration damping can be fitted in 3 locations for handed use.

Integrated Metabo VibraTech (MVT) anti-vibration system for reduced vibrations.

PERFECT FOR CONCRETE: WE 26-230 MVT QUICK.

Electronic safety shutdown of the motor if the grinding/cutting wheel jams. Long service life due to the electronic overload protection. Easy disc change thanks to the spindle stop and quick-locking nut. The side handle with vibration damping can be fitted in 3 locations for handed use.

Electronic safety shutdown of the motor if the grinding/cutting wheel jams. Long service life due to the electronic overload protection. Easy disc change thanks to the spindle stop and quick-locking nut. The side handle with vibration damping can be fitted in 3 locations for handed use.

Integrated Metabo VibraTech (MVT) anti-vibration system for reduced vibrations.

Rotating back handle for ideal handling during cutting.

Tool-free adjustable wheel guard; twist-proof.

Maximum productivity with the right accessories

- Reliable and efficient system
- Durable diamond cutting discs, perfectly aligned to the application material
- Protective cutting guard with guide blocks and connection for dust extraction
- Safety vacuum cleaner with test certificate for hazardous dusts
- Everything from a single source from Metabo!

KEEPING THINGS MOVING: THE SITE PUMPS.

Our site pumps perform well even in dirty water with coarse solids with a diameter of up to 50 mm – with low vibration, high output and minimum maintenance requirements. They can also be delivered with corrosion-resistant stainless steel housing on request.

- Double mechanical seal with oil chamber for a longer service life and a permanent protection.
- Ideal for continuous operation at a constant load thanks to the S1 motor operating mode.
- Overload protection and automatic shutoff for the motor.
- Two dirty water pumps (SP 28-50 S Inox and SP 24-46 SG) as well as two drainage pumps (DP 18-5 SA and DP 28-10 S Inox) are available.

Free passage with 50 mm opening.

Our system accessories for pump operation:
- Quick connection and safe system operation with 2” Storz coupling, (order no. 628800) and 15m long C Rubber drain set, (order no. 0903061294).

Self-cleaning Vortex-impeller wheel to minimise the risk of blockages.

Float switch for automatic mode provides run dry protection.

Integrated Metabo VibraTech (MVT) anti-vibration system for reduced vibrations.

Rotating back handle for ideal handling during cutting.

Electronic safety shutdown of the motor if the grinding/cutting wheel jams. Long service life due to the electronic overload protection. Easy disc change thanks to the spindle stop and quick-locking nut. The side handle with vibration damping can be fitted in 3 locations for handed use.

Integrated Metabo VibraTech (MVT) anti-vibration system for reduced vibrations.
STRONG PERFORMANCE, GENTLE ON JOINTS: THE KHE 5-40 SDS MAX COMBINATION HAMMER.

Besides drilling in concrete it also impresses when chiselling: this versatile combination hammer makes short work of old slabs, masonry or concrete foundations with its 400 J/s of impact performance. The integrated MVT damping system reduces vibrations as well as the stress on hand and arm joints.

More electronic soft start for precise spot-drilling and
rotation stop for chiselling.

Die cast magnesium gear housing for optimal heat
dissipation and weight reduction.

Wear indication for the carbon brushes shows when
they are due for replacement.

Optimised performance in various
materias thanks to the thumbwheel
speed preselection.

The Metabo VibraTech system (MVT)
reduces vibrations by over 30%.

Metabo S-automatic torque limiting clutch
for the mechanical uncoupling of the drive should the drill bit snag or stop unexpectedly.

COMPACT ALLROUNDER: UHE 2850 MULTI.

Hammer drill, drilling hammer and rotary drill in one: the UHE 2850 Multi with impact and rotation stop, forward and reverse, and 2-speed gear is extremely versatile. Plus, the Metabo Quick System means that chucks can be changed quickly and easily.

- Full wave electronics for working at
  the best speed to suit the application
  material.
- Metabo S-automatic torque limiting clutch for the mechanical
  uncoupling of the drive should the drill bit snag or stop unexpectedly.
- Metabo marathon motor with patented dust protection for long
  service life.
- High-performance impact mechanism in aluminium housing with
  precision bearings.
- Cable-protecting ball socket for optimal freedom of movement while
  working and wear protection for the cable.

MORE ON PAGE 88

CORDLESS POWER PACK: THE KHA 36 LTX CORDLESS COMBINATION HAMMER.

Drilling with and without impact or chiselling. The KHA 36 LTX provides three functions in a single machine and is ideal for chiselling channels or drilling feed lines and dowel holes.

The Metabo marathon motor with
its perfected impact mechanism
provides the best drilling performance
in the 3 kg cordless category.

- Metabo S-automatic torque limiting
  clutch for the mechanical uncoupling
  of the drive should the drill bit snag or stop unexpectedly.
- Ergonomic housing shape for chiselling tasks without a side handle.

can be found in the Metabo catalogue.

More info on page 88.

The Metabo VibraTech system (MVT) reduces vibrations by over 30%.

Maximum productivity
with the right accessories

SDS-Plus "Pro 4 Premium" drills
Quality without compromise for an exceptionally long service life.
For precise drill holes in challenging material such as reinforced concrete and hard natural stone.
You can find more drills from page 88.
THE PERFECT ADDITION FOR DECKING: THE KGS 18 LTX 216 CORDLESS CROSSCUT SAW.

Even powerful machines such as crosscut saws can be powered without mains supply as proven by the unique cordless KGS 18 LTX 216: the Ultra-M technology together with a 5.2 Ah battery pack always ensures maximum performance. The KGS 18 LTX 216 itself is practical, easy to transport and quick to set up.

The special circular saw blade for the cordless crosscut saw delivers high cutting performance and quality:

- “precision cut classic” HM/CT 216 x 30, 40 WZ
- Art. No. 628065.

The high-torque motor with overhead capacity means that it cuts like a mains powered cross cut saw.

- Safe workpiece support thanks to sturdy extendable table with extensions, removable on the left/right to accommodate long panels, boards, etc.
- Cutting line laser and LED work light both with energy-saving automatic switch-off.
- Metabo Ultra-M technology for maximum performance, gentle and efficient charging, optimum energy utilisation and long service life.
- Up to 400 cuts per charge with our durable 5.2 Ah battery pack.

FOR FITTING AND MODIFICATION WORK: THE CORDLESS JIGSAW ASSORTMENT.

Our cordless jigsaws retain their speed and accuracy despite the high loads and stresses incurred when cutting various types of wood. The stable design and the full cordless power with Metabo Ultra-M technology let you cut through beams up to 140 mm thick.

- Precise cuts and optimal ease of use thanks to an ultra-sleek body grip handle and spring-supported saw blade guide.
- Better view of the cutting line with integrated LEDs.
- Tool-free replacement of the saw blades with the Metabo Quick System.

FOR FORMWORK OR TIMBER STRUCTURES: THE KS 55 FS CIRCULAR SAW.

The KS 55 FS with its universal range of applications provides consistently precise cuts and can be mounted on Metabo guide rails and all other conventional systems without adapters. The stable die cast aluminium base plate ensures a secure position and supports clean and precise guidance.

- Ergonomic and safe handling thanks to the softgrip surfaces.
- Cutting depths up to 55 mm, bevel cuts up to 47°, angle lock at 45°.
- Connection for dust extraction available.

- Better view of the cutting line with integrated LEDs.
- Tool-free replacement of the saw blades with the Metabo Quick System.

MAXIMUM PRODUCTIVITY WITH THE RIGHT ACCESSORIES

Number of cuts per 5.2 Ah battery pack:

- soft square timber, KKV 50 x 50 mm: 200
- Laminates: 190 x 8 mm: 400
- Wood flooring, hardwood 140 x 22 mm: 180
- Decking boards, WPC 140 x 22 mm: 140

UNIVERSAL, VERSATILE AND ROBUST: ASE 18 LTX CORDLESS SABRE SAW.

For sawing wood, plastics, metal pipes and profiles or building material: our cordless sabre saw is a practical multi-talented saw for outdoor use. The sleek lightweight design features a softgrip handle for comfortable working in any position.

- Adjustable depth guide for the ideal utilisation of the entire saw blade and diverse applications such as plunge cuts.
- Metabo Quick System for changing saw blades without tools.
- Composite covered die cast aluminium gear housing for optimum handling.
- Vario (V)-electronics for comfortable working at customised stroke speeds to suit the application material.
- Saw blade rotatable by 180° for working comfortably overhead.

METABO SABRE SAW BLADES ARE AVAILABLE FOR ALL AREAS OF APPLICATION:

- for pipes, sheets, profiles...
- for metals, timbers, chipboards, building panels, plasterboard...
- for bricks, aerated concrete, fibre-reinforced materials, plastics, composite materials...

You can find a detailed overview in the Metabo catalogue.

ULTIMATE POWER, UNPARALLELED LONGEVITY:
W 12-125 COMPACT ANGLE GRINDER.

Sets new standards in power and longevity without burning-out or overheating. The Metabo marathon motor provides an enormous overload capacity, ultimate power density and a long service life. The small grip size provides almost perfect ergonomics.

- Longer service life due to optimised Metabo dust protection ports.
- Maximum safety thanks to Metabo S-automatic should the disc jam.
- Toolless disc change with the Metabo M-Quick System.
- Flexible operation thanks to the electronic overload protection.

POWERFUL DRIVE, QUICK CHANGE:
THE BS 18 LT QUICK CORDLESS DRILL / SCREWDRIVER

The powerful Metabo 4-pole motor and the innovative Ultra-M technology makes the BS 18 LT Quick extremely efficient and capable. The Metabo Quick System also makes it very versatile: for example, you can use the quick change bit holder and the angular gear to work in very tight spaces.

- Ultra-M technology for maximum performance, gentle and efficient changing, optimum energy utilisation and long service life.
- Battery packs with capacity display for checking the charge status.

PERFECT MIX OF DURABILITY AND ERGONOMICS:
NEW STIRRERS FROM 1,020 TO 1,600 WATTS

For the powerful mixing of mortar or concrete in gardening and landscaping we recommend our high-performance RWEV 1600-2. The strong motor and the 2-speed gearbox provide outstanding torque for tough and heavy mixtures.

- Flexible rubber cover on the on/off switch protects against pollution and increases functional reliability.
- The side cable exit reduces the risk of a cable break.
- Stable rubber corners protect against damage resulting from impacts or when the machine is laid down, and also offer slip-resistant support when stood up against a wall.
- Available in 4 versions: with single speed (RWE 1020 and RWEV 1200) or 2-speed (RWEV 1200-2 and RWEV 1600-2).

UNLIMITED FREEDOM AND MOBILITY:
AHS 18-55 V CORDLESS HEDGE TRIMMER

Professional hedge trimming without the annoying restriction of extension cables. The 2-speed gear provides a fantastic cutting performance and the electronic quick blade stop (in only 0.3 seconds) ensures maximum safety.

- Outstanding ergonomics aided by the soft grip handle.
- Comfortable working thanks to low-vibration operation.
- The impact guard prevents return debris on the machine and user.
- Cordless system compatible with the Metabo 18 volt product range.
- Double-sided diamond-ground blade teeth for clean and precise cuts.

THE MOST IMPORTANT ASPECT WHEN IT COMES TO SERVICE: YOUR SATISFACTION.

When deciding on a Metabo machine you always get a good feeling when you receive a quick and straightforward solution to any requirement. Be it maintenance, repairs or spare parts: We quickly bring you and your Metabo machine back together. Your readiness is the measure of all things. We know this, and consequently adjust our service to ensure it.

24 hour repair service
Machine broken? We step on the gas: Within 24 hours after reaching us, your machine will leave our premises ready to use. Guaranteed!

Spare part express service
Do you need to order spare parts up to 3pm? Even then you will have the spare part in your hands within 24 hours.

Fixed prices for repairs
Simply fair: Repairs are carried out at fair calculated fixed prices. And the best part: afterwards we grant a warranty of six months.

8 year guarantee of spare parts availability
Good to know: Even when we do not sell your particular angle grinder anymore, we can still supply you with the required spare parts for up to 8 years.

Free disposal of old tools
There will come a point when even the most durable Metabo machine will have had its day. In this case we gladly take care of the professional disposal for you.

Online services
At www.metabo.de/service you can obtain all information related to your Metabo machine and service.

3-year warranty
Your safety plus: After having registered your Metabo tool online, you receive a certified extension to the standard warranty – resulting in Metabo’s full 3 years warranty.
Metabo - always near you.
With 1,800 employees, 23 subsidiary sales companies and 100 importers on all continents, we have a global presence on site - and always there where you need us.

Any questions?
A team of product and application consultants is looking forward to hearing from you. You can reach them under +49 (0) 7022 72-3230 (Mon-Fri, 08:00 - 17:00 hours) or by email to anwendungsberatung@metabo.de.
