PROFESSIONAL POWER TOOL SOLUTIONS

PRESS RELEASE

Metabo Introduces Hand held Beveling Tools

Complete range of beveling tools

June 27, 2017 – West Chester, PA – Metabo Corporation, a leading international manufacturer of professional grade cordless and corded hand-held power tools and accessories, now offers two classes of beveling tools, compact and large. Metabo's

compact beveling tools are designed for internal and external chamfering, and the larger class offers unlimited bevel angle customization for weld preparation.

The compact beveling tools come in two versions, a corded model (KFM 9-3 RF) and a cordless 18V, model (KFM 18 LTRX 3 RF) taking full advantage of Metabo's leading Lithium High Density technology. The KFM 9-3 RF and KFM 18 LTRX 3 RF bevel or chamfer up to 1/4 of an inch depth at 45 degrees and include indexable cutters for 5/64 of an inch (2 mm) or 1/8 of an inch (3 mm) radii. In places where power isn't always available, cordless beveling tools are essential.

The large beveling tools come in three corded versions, (KFM 15-10 F, KFMPB 15-10 F, KFM 16-15 F) offering unlimited bevel angle customization from 0 degrees to 90 degrees with a maximum depth of up to 5/8 of an inch at 45 degrees (or 1-1/4 inch at 12.5 degrees). The patented mechanical safety brake in the KFMPB 15-10 F stops the cutting head in less than 1 second, significantly reducing the risk of injury in the event the operator loses control of the tool.

The complete range of beveling tools are equipped with a full electronic package that includes overload protection, restart protection (preventing the tool from restarting on its own in the event of a power interruption), soft start, speed stabilization and safety shutdown. The beveling tools "one touch" controller allows for precise

(by increment of 0.1mm or 0.004-in) tool-free depth adjustment that locks in. Instead of a large cutting head, Metabo beveling tools use indexable cutters. These can be rotated once they wear out (4 times), which saves a lot of money and allows for a long life.

"Metabo's new beveling tools offer the best of both worlds. They offer unlimited versatility while allowing for a precise and clean cold processing of metal. Compared to an angle grinder, Metabo beveling tools decrease processing time by up to five times" said Antoine Derché, Director of Product Management and Marketing.
