PROFESSIONAL POWER TOOL SOLUTIONS

PRESS RELEASE

Metabo Introduces Multi-bay 8 Pack Charger

Charge 8 batteries at the same time. Never run out of power.

July 7, 2017 – West Chester, PA – Metabo Corporation, a leading international manufacturer of professional grade cordless and corded hand-held power tools and accessories, now offers a Multi-bay 8 Pack Charger (627291000).

“The Multi-bay 8 Pack Charger is the world’s first industry charger that charges 8 batteries at the same time, making sure our industrial end-users are always ready to perform” said Antoine Derché, Metabo’s Director of Product and Marketing.

This charger can charge 18V or 36V batteries and is compatible with all existing Li-ion and LiHD (High Density) Metabo battery packs, including the NEW 7.0 Amp hour Lithium High-Density Battery. Charging time is independent of the type of batteries (18V or 36V) charging and number of batteries plugged in. There are LED indicators for each pack that let you know the battery’s condition and charge. Other user-friendly features include a handle for portability and wall mounting keyholes to save space.

The Multi-bay 8 Pack Charger is built for longevity, from its heavy-duty aluminum housing to Metabo’s patented Ultra-M Air-Cooled Technology that accelerates the charging of hot batteries, resulting in a faster charge and increased battery life.

This charger is ideal for industrial production and becomes the central power station of the shop. Operators can perform their work with cordless tools while back-up batteries are getting ready. This is the only charger in the industry offering that possibility.
