# PRESS RELEASE

## Metabo Introduces the 18V Professional Hand-held Cordless Mixer

*For quick and efficient mixing of materials without plugging in a cord!*

**September 25, 2017 – West Chester, PA** – Metabo Corporation, a leading international manufacturer of professional grade cordless and corded power tools and accessories, introduces the 18V Cordless Mixer (item #601163850), made in Germany.

“The 18V Hand-held Mixer (RW 18 LTX 120) is ideal for any job. The machine’s power allows for fast and efficient mix of paint, mortar or even concrete and ensures a consistent mixture; this mixer is the right tool for the job,” said Antoine Derché, Metabo’s Director of Product and Marketing.

The cordless mixer’s powerful high-torque motor with variable speed enables the user to customize the speed of the tool to the material being mixed. Like all of Metabo’s tools, the RW 18 LTX 120 mixer has features that not only make it safer to use but more efficient and longer-lasting. Overload protection keeps the motor from overheating in heavier materials like concrete, while an electronic soft start feature allows for splash-free mixing of less dense materials. The mixer features a “race car” style steering wheel with split handle and an easy to reach variable speed trigger, making the Metabo cordless mixer the most comfortable to use.

Metabo’s Ultra-M battery platform provides high performance, efficient charging, optimum energy use and long service life. When using a 5.2 Amp hour battery, the cordless mixer can stir from 1 to 113 gallons of paint or up to 26 gallons of concrete or mortar mix on one charge. And while using Metabo’s patented 7.0 Amp hour LiHD battery pack, it can stir up to 160 gallons of paint or 37 gallons of concrete.

**FOR IMMEDIATE RELEASE**

The RW 18 LTX 120 cordless mixer comes standard with an RS-R2 heavy duty mixing paddle. The RS-R2 mixing padding is a 4.7 inch diameter, right spiral paddle that mixes from the bottom to the top, ideal for sticky materials. A RS-R3 mixing paddle is also available, perfect for heavier and more viscous materials.
