PRESS RELEASE

Metabo Introduces its New Ergonomic Rat-tail Burnishing Machine
For all your stainless-steel burnishing needs

January 8, 2018 – West Chester, PA –
Metabo Corporation, a leading international manufacturer of industrial grade cordless and corded hand-held power tools and accessories, introduces the SE 17-200 RT, Ergonomic Rat-tail Burnishing Machine, made in Germany.

“Metabo’s powerful high torque, high overload capacity burnishing machine is made for productivity, control and comfort while working for longer periods of time. It’s perfect for grinding, burnishing, polishing and creating finishes, for example; a #4 finish on stainless steel or even a mirror finish,” said Terry Tuerk, Metabo’s Senior Product Manager.

The LongLife 14.5 Amp motor with extended carbon brush life has VTC (Vario-tacho-constamatic) full-wave electronics for maximum productivity. VTC is Metabo’s exclusive technology that maintains RPM under load. It includes an adjustable thumbwheel and planetary reduction gear for customized working speeds of 800-3,000 RPM for use in a variety of applications using belts and wheels ranging from 40 to 2000 grit. It can also fit up to an 8” polishing buff.

Like all Metabo’s tools, the burnisher has features that not only make it safer to use but more efficient and longer-lasting. The rat-tail design as well as the tool less adjustable guard and top handle, create the most advanced ergonomics. Overload protection keeps the motor from overheating, and the electronic soft-start feature allows for smooth start-up. The burnisher also features restart protection, which protects users from accidental start-up after power has been interrupted.

FOR IMMEDIATE RELEASE
The Burnisher accepts ¾" keyed or 5/8" - 11 accessories and comes standard with a steel carrying case, expansion drum, three 80 grit zirconia belts, 80 grit flap wheel, 180 grit interleaved flap wheel and a 280 grit non-woven nylon wheel, everything you need to get started with this multi-tasking tool.
