PROFESSIONAL POWER TOOL SOLUTIONS

# PRESS RELEASE

Metabo Germany Announces its partnership with 8 other power tool manufacturers to create the **Cordless Alliance System (CAS)**

*The Cordless Alliance System is the first of its kind*

June 2018 – Metabo in Nürtingen, Germany announced its partnership with other tool manufacturers to create the Cordless Alliance System (CAS).

Under the CAS partnership, nine manufactures of similar company size and with a clear focus on power tools for professional

applications, will be sharing the same battery platform and chargers produced by Metabo. This grants CAS manufactures the use of the same battery pack systems, allowing the 100% compatible batteries to be interchanged with other CAS manufacturers tools.

When choosing a technology partner, CAS manufacturer Rothenberger decided to go with Metabo for several reasons, says Dr. Christian Heine, Managing Director, “Due to the developments in the past years, Metabo has conquered the technological leadership and currently offers the most powerful system in the industry.”

This new partnership provides end-users more freedom, flexibility with a broader range of tools and unique problem solvers and costs savings by sharing

FOR IMMEDIATE RELEASE

the same battery platform across multiple tool manufacturers. Currently, there are over 110 power tools that encompass the Cordless Alliance System Manufacturers. Horst Garbrecht, President of Metabo, expects the CAS to continue to grow, with a variety of manufacturers joining in the name of advanced battery technology.

“With Lithium-Ion High-Density Battery (LiHD) we have enough power for the most energy-intensive applications, allowing us to build any hand-held power tool in a cordless version in such a way it meets the professional user’s requirements of power and endurance,” said Horst Garbrecht.

The partnership is the latest step towards expanding Metabo’s vision of a cordless construction site, and metalworking shop entirely run with 18V Lithium-Ion High-Density Battery operated tools. This proves that Metabo is the most innovative and forward thinking tool manufacturer in the industry today.
