# PRESS RELEASE

## Metabo's New 18V Brushless High-Performance Multi-Tool

*Optimized for solid grip control and maximum comfort*

### January 2021 – West Chester, PA

Metabo Corporation, a leading German international manufacturer of professional-grade cordless and corded hand-held power tools and accessories in the US introduces the Metabo 18V brushless Multi-tool.

“The 18V multi-tool is optimized for handling and comfort. It has a slim, rubber-coated grip and its battery is placed out of the way for maximum

balance and optimal reach into tight spaces. Vario-speed Constamatic Electronics allows the high-performance brushless multi-tool to maintain OPM under load for the highest productivity. This tool can tackle a wide range of applications cutting wood and metal to grout removal. It is particularly handy for making pocket cuts or creating openings in subfloors or drywall, or flush cutting trim work.” said Terry Tuerk, Metabo’s Senior Product Manager.

The Metabo MT 18 LTX BL QSL, 18V multi-tool, is available as a bare tool (613088850).

The tool includes a curved-tech StarlockPlus® wood + metal blade.

Metabo also offers a combination depth stop/dust extraction accessories, as well as StarlockPlus® sanding plate, sanding discs, and various StarlockPlus® plunge cut precision saw blades for wood, metal and abrasive materials.

The MT 18 LTX BL QSL includes a variable oscillating speed selector for adjusting the cutting speed for precise cuts and sanding of various materials. Its powerful Metabo brushless motor delivers 8,000-20,000 OPM per minute.

This tool's unique features include an integrated double LED illumination light and tool-less magnetic blade change system for fast and easy blade changes. Metabo’s compact 4.0Ah LiHD would be the perfect battery to match with the tool.

**FOR IMMEDIATE RELEASE**

Metabo has over 90 tools in their cordless line with many more on the way. They have the most complete range of cordless metalworking and industrial tools in the market. Metabo's cordless tools deliver industrial productivity and POWER, eliminating the need for cords and hoses.

Metabo battery systems are 100% compatible with older and newer cordless tools. Since 2009, all Metabo battery packs, tools, and chargers in the same Volt class are interchangeable with each other. Ultra-M technology makes this possible due to the perfect communication between tools, battery packs, and chargers. Ultra-M technology allows batteries to be charged gently and efficiently, and patented air-cooled technology means they can be used again in just a short time.

Metabo batteries offer the latest cell technology, LiHD, high density lithium-ion, with 80% more available power and 100% longer run time than Metabo's standard Li-Ion batteries. Both feature electronic monitoring of each individual cell for increased protection and maximum battery durability, while an LED charge capacity indicator shows the charge at the touch of a button. Metabo continues to set the bar for industry standards in battery technology through new innovations.

All Metabo cordless tools are backed by a 3-year warranty and offer a full 3-year replacement guarantee on the battery and charger systems. To find out more about the tools mentioned above and other Metabo product offerings, please visit:
