PRESS RELEASE

Metabo Introduces 2 NEW 18V Circular Saw Cutting Systems
Portable, high performing, cross cutting/mitter, and plunge cutting/track system solutions

March 2022 – West Chester, PA
Metabo Corporation, a leading German international manufacturer of professional-grade cordless and corded hand-held power tools and accessories in the US, introduces their new 18V 6 1/2” Brushless Circular Saws and cross-cut guide rails.

We are excited to announce two new portable, high performing cross cutting/mitter, and plunge cutting/track system solutions, the KS 18 LTX 66 BL 18V Brushless Deep Cut Circular Saw plus KFS 30 / KFS 44 cross cut and miter rails, and the KT 18 LTX 66 BL 18V Brushless Variable Speed Plunge Cut Track Saw.

“When the KS 18 LTX 66 (611866840) deep cut saw is combined with the KFS 30 (629015000) or KFS44 (629016000) cross-cutting rails, it transforms into an extremely portable, high performing cross cutting/mitter system. The KT 18 LTX 66 BL (601866840) variable speed plunge cut saw is compatible with the FS 80 (629010000) and FS 160 (629011000) Guide Rails. These guide rails are also compatible with circular saws from other manufacturers. Users of these saws include framers, carpenters, deck builders, renovation contractors, custom cabinet makers and those working on flooring or trim”, said Joseph Masters, Metabo’s Cordless Product Manager.

The KT 18 LTX 66 BL cuts smooth and precise plunge cuts up to 2-19/32” (66mm) deep with minimal tear out. For exact cutting precision, the saw has an undercut function of -1° to +46° for custom fit transitions. The KT 18 LTX 66 BL is also ideal when you need to cut close to walls, cutting as close as 9/16” (14mm).

FOR IMMEDIATE RELEASE
This tool has powerful brushless motor technology and electronic variable speed of 2,250 – 5,000 RPM which ensures high performance on a wide variety of materials. The KT 18 LTX 66 BL includes an electronic brake system, stopping the saw blade within seconds of releasing the trigger. The saw also sports a die-cast aluminum saw blade housing with transparent viewing window for improved visibility and accurate cutting. When paired with the FS 80 or FS 160 guide rails, the system becomes a high-performance track saw for precise cuts in sheet materials. The KT 18 LTX 66 BL includes a high performance 6-½” 40 tooth saw blade and dust collection bag.

The KS 18 LTX 66 BL cuts up to 2-19/32” (66mm) deep and can be adjusted from 0° to 46° with a stop at 45° for precise cutting. The saws integrated LED light is great for illuminating the work area. The KS 18 LTX 66 BL includes a manual lever that lifts the blade guard for smooth cuts and keeps the user’s fingers well away from the spinning blade. Like the KT 18 LTX 66 BL, the KS 18 LTX 66 BL also has an electronic brake system and brushless motor. The KS 18 LTX 66 BL includes a high performance 6-½” 18 tooth saw blade.

Both saws include a reversible arbor for blades with either a 5/8” or 20mm arbor. Also, both come packaged in the MetaBOX 340 stackable case. In addition, portable dust-free cutting is possible when attaching the tool to Metabo’s 18V cordless vacuum the AS 18 PC HEPA (602021860) via the adjustable dust ejection nozzle.
